BEYOND THE PANDEMIC
Golf Market Trends 2021
The Back-to-Normal Barometer

**AMERICA STANDS AT AN INFLECTION POINT**

- We just completed the seventeenth wave of a monthly tracking study that listens to the voice of the consumer
  - Survey research
  - In-depth interviews
  - Social media analyses
  - Online dial tests

What’s it going to take to bring consumers back?
Where is the greatest pent-up demand?
What will the new normal look like?
How do various sports and leisure activities navigate through these times?
The Back-to-Normal Barometer

ORIGINS

2001 Golf Digest Companies Travel Confidence Index

- Measured golfer attitudes vs. the affluent general public
  - Willingness to travel
  - Willingness to spend on luxuries and discretionary purchases
  - Consumer attitudes on personal finance, the prospects for retirement and the U.S. economy

2009-Present  Sports and Leisure Research Group Golfer Omnibus Work

- Presented annually at PGA Merchandise Show Wednesday Breakfast tracks forward looking golfer perceptions on the year ahead in:
  - Overall participation levels
  - Outlook on planned spending across hard goods, soft goods and travel categories
  - Golfer attitudes on personal finance, discretionary spending and the U.S. economy
  - Contemporary issues in golf
Golf 20/20 Meets Golf 2020

COVID HAS SPAWNED A POTENTIAL NEW GOLF BOOM?

- Anecdotally and empirically we see full tee sheets
  - Amidst reports of increased play from existing golfers
  - And renewed trial from lapsed and never before players
- Golf has successfully positioned itself in the short term
  - As one of the few viable options for outdoor recreation
  - AND socialization
    - Bars are closed—But not the drink cart!
  - Adhering to safety and sanitation protocols
  - An “oasis from the chaos.”

WHAT DOES THE LATEST BAROMETER DATA TELL US?
Golfers are Self Reporting Comparatively Higher Rounds Per Capita Than A Year Ago

WHICH OF THE FOLLOWING BEST DESCRIBES YOUR GOLF ACTIVITY SINCE COURSES RE-OPENED IN YOUR AREA DURING THE PANDEMIC?

- I am playing much more than I did last year
- I am playing slightly more than I did last year
- I am playing the same amount of golf as I did last year
- I am playing slightly less than I did last year
- I am playing much less than I did last year
Why Golfers are Playing More... It’s Situation Specific

**WHY ARE PEOPLE PLAYING MORE GOLF NOW?**

- Golf is a safe activity during the pandemic: 65%
- There are fewer other sports that people can participate in: 52%
- People have more time on their hands in general: 50%
- Golf courses have done a great job of promoting the game: 50%
- Golf fills a void of available social activities: 44%
- The most passionate players are valuing the sport even more, now, during these trying times: 43%
- People who don't normally play golf are seeking it out as a form of exercise: 37%
Golfers are More Likely to be “Recently Active” or “Ready to Go” vs. Sports Fans

Golfers Have Consistently Been More Confident Throughout the Pandemic
America Remains on Edge...

Most are dissatisfied with the COVID vaccine roll-out

- They believe vaccine distribution comes down to their state and local government

- They are generally skeptical that government has an adequate process in place to distribute the vaccine
  - We have the doses, but distribution is behind schedule
  - Medical facilities seem to be under-staffed
  - It’s unclear when they’ll get it (some are higher priorities)
  - These factors are dampening their optimism about getting back to normal
EVEN WITH A VACCINE, “NORMAL” FEELS A YEAR AWAY

• Despite some already getting vaccinated and others planning to, they don’t expect this will impact their willingness to fully engage in public activities in the near-future – the vaccine isn’t a “silver bullet”

• They will continue to socially distance, wear masks, and take other precautions
  o We don’t know who has been vaccinated by looking at them
  o Vaccinated people can still carry it and infect others, even if they have personally built up an immunity to the virus
  o Getting enough people vaccinated to reduce the spread will take several months
America Remains on Edge...

OUTLOOK FOR 2021

- All Mid January Depth Interview Respondents see light at the end of the tunnel with the pandemic, especially as more people get vaccinated.

- Their expectations for this year include:
  - The pandemic will get under control – fewer cases and deaths
  - Anyone who wants a vaccine will be able to get one by June
  - Improved vaccines – fewer side effects; addresses new strains
  - Businesses will re-open, maintaining rules to ensure safety
  - Continuing to work from home until at least the late summer
  - Children will return to school full-time by the Fall
...So We Likely Have Much Of ’21 to Ride Golf’s Surge

Q. Using a scale from 1-10, where 10 indicates that from the standpoint of COVID-related restrictions, safety protocols, business closures, or capacity limitations, the country will be up and running as it was pre-pandemic, 5 indicates that things will be no different than they are today and 1 indicates we will be in full lockdown, where do you anticipate that the country will be...

WORTH NOTING:

A **THREE YEAR HIGH** in those who strongly agree that buying new golf equipment has become a more complicated process in recent years...38%...overall and nearly 50% among SINGLE DIGIT HANDICAPPERS
A Broader Look at Participation

43% plan to visit a TopGolf location this year...53% of those living in designated urban/city markets

45% plan to play more 9-hole rounds this year vs. last year

-8% DROP in those who believe the game is facing major challenges in regards to growing overall participation
Amidst Worry, YOU Need To Have Their Backs

- Wisdom, certainty, and trust are in short supply

- Americans don’t believe others are being as diligent in their adherence to safety protocols as they are

- In the absence of clear guidance, one’s confidence to re-engage is tied to an ability to control the health risk of a given experience

- Your challenge: Can you enhance the semblance of personal control? Can you provide the certainty people crave?
  - Message: “You don’t have to worry about others’ behavior; we’ve got you covered.”
Example of Giving Certainty & Getting It Right

“At the hotel, they did the extra guidelines and took the effort to have extra cleaning, make sure [there was] spacing. The staff and everyone was wearing masks. It had a pool [at] the place that we stayed, and they had it set up that you would schedule your time there. That way people weren’t interacting too much. It’s kind of what I was expecting that they would do in a case like that. [Their attitude was,] ‘We’re going to try and stay open, but we’re going to follow the guidelines how we’re supposed to.’ It was a great experience overall.

– Nick (Male, age 36, California)
WYSIATI: “What You See Is All There Is”

- Customers want more information on what you’re doing
- Demonstrate your commitment to cleaning with evidence throughout the business
  - Hand sanitizer stations
  - Cleaning staff
  - Information available on protocols
  - Certificates/checklists posted
- Reinforce commitment at other key touchpoints
  - Website for making reservations
  - Additional reassurance for employee contact that they don’t see
Remember *Goldilocks*

- Too much overt prevention is no fun; too little signals danger
  - Customers want companies to take steps that aren’t overbearing
  - Yet they may question if the business should be open
- Fear/anxiety impedes enjoyment, especially with kids
- People don’t expect returning to normal to be “normal,” and some will make their own changes
- Business travelers may accept more inconveniences than pleasure travelers
What’s Creating Greatest Levels of Reassurance?

- Increased and visible cleaning of public spaces
- Facial Covering Requirements Indoors
- Abundantly Available Hand Sanitizer Stations
- Spacing of furniture and fixtures
- Limited capacities
- Temperature Screenings
- Touchless Transactions
  - Including QR Code usage for F&B menus and automated ordering
- Physical/plexiglass barriers
Implications

- We’re at an inflection point
- The country’s patience has been increasingly tested as economic and social concerns are at par with health concerns; while public trust is at a low point
- Properties that successfully do the following will prevail:
  - Creatively engage their customers—Eschewing the empty, “We’re in this together,” platitudes
  - Offer hope and clear expectations for a return to normalcy
  - Articulate their efforts to assure a safe and thoughtful return
  - Get the testing protocols right for employees & guests
  - Do their homework so they know who’s ready to go, & who’s not
Implications

**SHORT TERM**
- A Significant Opportunity to Create Enduring Connections
  - Strike while the iron is hot

**LONG TERM**
- Remember the Short Lived Tiger Boom
  - Be welcoming and create the right experience
  - Connect with your customers
  - Think broadly about the competitive set
